APPLICATION INSTRUCTIONS: For optimum results, HydroSol Tomato should be used in a balanced plant nutrition program, including Calcium Nitrate and Magnesium Sulphate. Do not apply to plants that are undergoing moisture or heat stress. Consult your chemical distributor, consultant or the registration holder should crop specific programmes be required, or if any additional information and guidance is required concerning the use of this product.

DIRECTIONS FOR USE (USE ONLY AS DIRECTED)

Please Note: Due to variable conditions, the following directions of use should only be used as guidelines.

HydroSol Tomato should be used as part of a balanced nutritional program, which includes Calcium Nitrate, Nitric Acid and Magnesium Sulphate.

HydroSol Tomato cannot be mixed with Calcium Nitrate in a stock or mother solution and it is therefore recommended to make use of separate tanks.

HydroSol Tomato, Magnesium Sulphate and Nitric Acid should be dissolved in a separate tank (Tank B) from Calcium Nitrate (Tank A).

The stock or mother solution (Tank A and B) can be prepared according to the size and dilution factor of the application system.

The following stock or mother solutions is recommended for mixing tanks with a volume of 1 000 ℓ each:

TANK A (1 000 ℓ)

Calcium Nitrate 60 kg

TANK B (1 000 ℓ)

HydroSol Tomato 100kg
Magnesium Sulphate 20kg
Nitric Acid (pH control 5,5 – 6,5)

This stock or mother solutions will be sufficient for 100 000 ℓ irrigation water.

WARRANTY Although this product has been extensively tested under large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic conditions as well as method, time and accuracy of application.
