WARNING

Product Description:

- **SeedStart Legume** is a liquid nutritional seed dressing for use with broad acre legume crops.
- **SeedStart Legume** contains nutritional elements and natural growth stimulants, required by leguminous plants during the germination period.
- **SeedStart Legume** will promote uniform germination, root development and seedling vigor.

Compatibility:

- It is advisable to do a miscibility test prior to mixing **SeedStart Legume** with other agricultural products.

Mixing Instructions:

- Shake the container thoroughly before use.
- Dosing equipment must be carefully calibrated to ensure correct and even application.
- **SeedStart Legume** may be diluted with water by adding 0.5 - 1.0 part water to 1 part **SeedStart Legume**.
- Treated seeds should not be carried over from one season to the next.
- Plant treated seeds as soon as possible.

Storage:

- Store in the original, well-sealed container away from direct sunlight in a cool dry environment.
- Keep away from children, uninformed people, animals and foodstuffs.

Warning:

- Handle with care.
- Do not re-use the container for any other purpose.

Directions for use: (Use only as directed)

CROP	Dosage Rate (ℓ/ton Seed)	SLURRY APPLICATION (ℓ/ton Seed)
Soya Bean	2 ℓ	Mix SeedStart Legume with water so that the total slurry does not exceed 15 ℓ per ton of seed. If 15 ℓ of SeedStart Legume is used, do not add any water.
Lucern (Alfalfa)	2 ℓ	Mix SeedStart Legume with water so that the total slurry does not exceed 15 ℓ per ton of seed. If 20 ℓ of SeedStart Legume is used, do not add any water.
Lupins	2 ℓ	Mix SeedStart Legume with water so that the total slurry does not exceed 15 ℓ per ton of seed. If 15 ℓ of SeedStart Legume is used, do not add any water.
Beans	2 ℓ	Mix SeedStart Legume with water so that the total slurry does not exceed 15 ℓ per ton of seed. If 15 ℓ of SeedStart Legume is used, do not add any water.
Peas	2 ℓ	Mix SeedStart Legume with water so that the total slurry does not exceed 15 ℓ per ton of seed. If 15 ℓ of SeedStart Legume is used, do not add any water.
Chickpeas	2 ℓ	Mix SeedStart Legume with water so that the total slurry does not exceed 15 ℓ per ton of seed. If 15 ℓ of SeedStart Legume is used, do not add any water.

Warranty:

Although this product has been extensively tested under large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic conditions as well as method, time and accuracy of application
